H. J. Tyler of Fort Worth is in the city and expects to make Tulsa-his headquarters in the future.

TO WAR ON SPEEDERS

Riwanians Favoring Public Display of Auto Victims for Benefit of Guilty Persons. Special to The World. OKMULGEE, Dec. 32.—To bring

St. Louis railrond, now standing in Nashville, Tenn. When the introduction of coal, the balloor gave way to the diamond stack which was topped with a mething like a chimney pot. The straight stack earns into fashion hi about 1888-90. The engines by that time had grown heavier the boilers larger, the fire boxes longes, and the wheels larger for passanger service and smaller for traighd.

Early locomotives did not trake great speed. Peter Cooper's that model attained is miles an hoar, and although Baldwin's Gid from sides is said to have made 60 miles an hour for a short time, such speed was exceptional. Faster travel became possible with alrorakes, heavier locomotives, greater adhesion and better ballasted roadbeds. Like a racing automotive bile, like an airplane body and like an ocean greyhound, the modern incomiotive with its long cylinder looks built for terrific speed. Yet speed is not the outstanding trigumph of recent construction. Three thousand horse power, that is the high mark of strength, combined with seconomy in the use of fuel and ready response to engineer's will.

The Age of Giants.

Increase in the number of modern of the fire of the number of modern of the number of the speed is not the unmber of modern of the number of the n OKMILGEE, Dec. 39.—To bring before the public the shocking traggedy that stalks in the wake of speed-mad drivers, Ralph Davis, a member of an Okmulgee undertaking firm, offered at the weekly lunched of the Riwanis club to display the victure of an automobile accident, coffing and all, in some conspicuous place as a ghastly warning to meterists. The members of the Riwanis club have joined Mayor Orlando Swain and ather public-spirited citizens in the campaign against rackless drivers and speed demons, and also ers and speed demons, and also drunkes drivers and immature children drivers of automobiles. Two committees will be appointed to check up this work. The first committee wat undertake to determine The Age of Giants.

Increase in the number of wheels, two pair on the Dewitt Clinton and 12 pair on the Mallet articulated triplex is shown at the exhibition by a photograph of No. 16, the first locometive built for the white-painted Ghost train, an express between Boston and New York. This Ultima of 1889 had three pair of driving wheels, but yould not be used because it was too heavy for the bridges.

The age of the giants came with

The Age of Glants.

tees will report at the meeting next Lonely Widow Burned to Death.

Lonely Widow Burned to Death.

TILTON, N. H., Dec. 25 - For many years, Mrs. Sarah P. Comes. ford, 83, an Invalid, has lived alone in a tiny farmhouse near here and to assure her friendly neighbors that she was safe through the watches of the night; it has been her custom to keep a light burning in the front window. Last night the window was left open a triffe, blowing a curtain to the flaming inmp. action; the to the flaming lamp, acting the house afire, the helpless widow per-ishing in the flames.
